IV. SITE RECRUITMENT NEEDS

This information is used to calculate vacancy rate and to assist in understanding which sites have greater recruitment needs. One FTE = 40 hours of work.

- Current FTE (A): By provider category, complete the filled FTE as of July 1, 2006. Include FTE currently filled by federally affiliated providers such as the National Health Service Corps and providers already receiving state loan repayment. **Do not leave blank.**
- Vacant FTE (B): By provider category, indicate how many of the additional budgeted FTE are or will be vacant at any time between July and December of the current year. This includes all vacancies you are actively recruiting to fill, regardless of whether you are seeking loan repayment assistance for that FTE. Report as FTE – not positions. Write in zero if no positions are vacant. **Do not leave blank.**
- Current FTE and Vacant FTE should equal Total FTE (A+B).
- If you expect current budgeted FTE levels to change over the year, use FTE levels expected at the end of the current calendar year. A budgeted FTE means a FTE for which a budgeted amount has been set aside and is available.
